PROFESSIONAL SUMMARY

Technical Product Manager with 5+ years owning complex technical products end-to-end — from roadmap design to community governance — in regulated, high-stakes naval defense environments. PhD in Computer Science, specialised in AI and multi-agent systems. Known for mobilising internal and external resources through strategic storytelling and stakeholder influence, and for bridging technical teams, academic partners, and executive decision-makers around a shared product vision. Currently building a side SaaS venture (DecaSaaS), with first paying clients onboarded. Seeking an on-site role in Abu Dhabi (UAE) from early 2027.

EXPERIENCE

Product Manager – LOTUSim Platform

2021 – Present

Naval Group

Ollioules, France

- Lead end-to-end product ownership of an open-source multi-agent simulation platform (🔗 [GitHub repo](#)), adopted by ~**30 academic and industrial users** across France, Australia and Singapore.
- Built and maintain a structured product backlog with prioritised user stories aligned to business value and persona needs.
- Designed and own the product roadmap, prioritised by persona and business value.
- Chair the biannual strategic steering committee and the monthly technical committee.
- Lead agile ceremonies and backlog reviews oriented around macro-vision.
- Manage open-source governance: GitHub contributor workflows and AI-assisted contribution policy.
- Track product adoption across **10+ PhD projects** and **5 R&D programmes**; use data to inform prioritisation decisions.
- Publish a bilingual community newsletter (FR/EN); preparing a dedicated LOTUSim technical conference (Marseille 2026, 100+ expected participants).

Product Manager – Side Project

2025 – Present

DecaSaaS

Remote

- Built and launched a SaaS generating automated AI performance reports for sports clubs; onboarded first paying clients.

AI Product Integration Engineer

2019 – 2021

Naval Group

Toulon, France

- Led and reviewed two industrial PhD projects (CIFRE) on applied AI solutions for naval systems.
- Established R&D partnerships with international research laboratories.
- Integrated external innovations into internal product roadmaps.
- Designed and led internal AI training programmes in collaboration with data scientists to accelerate adoption across engineering teams.

AI Decision-Support System

2018 – 2019

Naval Group

Toulon, France

- Developed an AI-based decision-support product for ship and submarine mission planning.
- Translated operational requirements into deployable product features.
- Co-invented the underlying trajectory-optimisation method, filed by Naval Group as an international patent (first-named inventor).

Ph.D in Computer Science

2014 – 2017

Atos

Marseille, France

- Designed a weather-routing decision-support system for fuel-cost optimisation using time-dependent, multi-criteria route planning.
- Gathered requirements from commercial shipping stakeholders; implemented and validated the solution in Java.

EDUCATION

Ph.D in Computer Science (CIFRE) <i>Aix-Marseille University / LIS Laboratory in partnership with Atos</i>	<i>2014 – 2017</i> Marseille, France
Master’s Degree in Operations Research <i>ENAC – École Nationale de l’Aviation Civile</i>	<i>2014</i> Toulouse, France
Engineering Degree in Software Engineering <i>INSA Toulouse</i>	<i>2014</i> Toulouse, France

SKILLS

Product Management Roadmap & Backlog Ownership · User Story Design · Agile / Scrum · Go-to-Market · Product Analytics · Strategic Storytelling
Leadership & Alignment Stakeholder Alignment · Resource Mobilisation · Cross-functional Collaboration · Community Building
Technical Domain AI / Machine Learning · Multi-Agent Systems · Simulation · Cognitive Twins · Operations Research · SaaS
Tools Jira · Linear · GitHub · GitLab · Python · Java

CERTIFICATIONS

Professional Scrum Product Owner™ I (PSPO I)  link to certificate
Oracle Certified Professional, Java SE 8 Programmer  link to certificate

AWARDS

Naval Group Scientific Innovation Award –  Prix La Pérouse – Awarded for the design of a naval cognitive twin enabling real-time simulation and prediction of operator and team performance in operation.	<i>2025</i>
Naval Group Scientific Innovation Award –  Prix La Pérouse – Awarded for the development of an AI-based decision-support system for submarine route optimisation.	<i>2019</i>

PATENT & SELECTED PUBLICATIONS

Patent — First-named inventor, <i>System for Planning an Optimised Trajectory of a Marine Vehicle</i> , international application  WO 2022/136355 A1 (Naval Group, 2022). Author of 5+ peer-reviewed publications in AI & multi-agent systems —  full list on Google Scholar .

HOBBIES & PERSONAL PROJECTS

- **Product dashboards** – Designed a React training dashboard for Sierre-Zinal, turning training history, fatigue, readiness and race milestones into an actionable daily view.
- **Ontology & AI planning** – Independently developing the open-source  LOTUSim Scenario Generator: an ontology-driven pipeline connecting mission, task, state and method catalogues to HTN planning.
- **User journey & funnel visualisation** – Built an interactive ecosystem map connected bidirectionally to an application pipeline to structure and monitor an Abu Dhabi job search.
- **Data storytelling** – Create infographics and illustrated explainers on women in music, elite athlete salaries and the Israel-Lebanon conflict.
